The sixth edition of the biennial contemporary art exhibition *Personal Structures* features a wide selection of artworks from internationally-renowned and emerging artists, photographers, and sculptors as well as worldwide academic institutions. The title *Echo Location 12* refers to the unperceived spatial waves that permeate the earth's atmosphere, referring to those muted voices that remain unnoticed by human routine. In response to the given architecture in the exhibition space the concept is extended in the exhibition space by punctuation marks that brace an axis of the work.
